1995 MAXIMA (A32) OIL FILTER APPLICATION

APPLIED MODEL: 1995 Maxima (A32)

SERVICE INFORMATION

The oil filter has been changed for the new 1995 Maxima (A32). The new filter is physically smaller in size, has a metric thread and an internal relief valve. Although the filter is similar in size to the filter for the SR20DE engine the filters are **not** interchangeable. The tool used to remove the oil filter on the SR20DE engine may be used to remove this filter.
