AUTOMATIC TRANSMISSION FLUID

APPLIED VEHICLES: All with automatic transmissions

SERVICE INFORMATION

For all former and all current Nissan vehicles equipped with automatic transmissions, Nissan recommends the use of Nissan Matic 'D' Automatic Transmission Fluid. Nissan Matic 'D' is formulated to best meet the requirements of Nissan automatic transmissions and automatic transaxles. Nissan Matic 'D' assists in ensuring transmission durability, smooth driveability, low exhaust emissions and customer satisfaction.

Dexron™ III/Mercon™ or equivalent automatic transmission fluid may also be used.

These recommendations apply to both front wheel drive and rear wheel drive vehicles.

NOTE: Only Nissan Matic 'D' Automatic Transmission Fluid is authorized for use in performing warranty, service contract or goodwill repairs, or other repairs to Nissan vehicles to be paid by Nissan. Nissan will not reimburse dealers for use of non-genuine Nissan automatic transmission fluid for such repairs.

For ordering procedures, please refer to Parts and Service Field Bulletin No. N-1122 (NPB/95-006) dated February 23, 1995.
